Preface	xiii
General references on dairy chemistry	xv
1 Production and utilization of milk	1
1.1 Introduction	1
1.2 Composition and variability of milk	1
1.3 Classification of mammals	3
1.4 Structure and development of mammary tissue	4
1.5 Ultrastructure of the secretory cell	7
1.6 Techniques used to study milk synthesis	8
1.6.1 Arteriovenous concentration differences	8
1.6.2 Isotope studies	9
1.6.3 Perfusion of isolated gland	9
1.6.4 Tissue slices	10
1.6.5 Cell homogenates	10
1.6.6 Tissue culture	10
1.7 Biosynthesis of milk constituents	11
1.8 Production and utilization of milk	11
1.9 Trade in milk products	18
References	20
Suggested reading	20
2 Lactose	21
2.1 Introduction	21
2.2 Chemical and physical properties of lactose	23
2.2.1 Structure of lactose	23
2.2.2 Biosynthesis of lactose	23
2.2.3 Lactose equilibrium in solution	25
2.2.4 Significance of mutarotation	27
2.2.5 Solubility of lactose	27
2.2.6 Crystallization of lactose	28
2.2.7 Problems related to lactose crystallization	31
2.3 Production of lactose	39
2.4 Derivatives of lactose	42
2.4.1 Enzymatic modification of lactose	42
2.4.2 Chemical modifications	43
2.4.3 Fermentation products	50
2.5 Lactose and the Maillard reaction	54
2.6 Nutritional aspects of lactose	56
2.6.1 Lactose intolerance	58
2.6.2 Galactosaemia	61

2.7	Determination of lactose concentration	62
2.7.1	Polarimetry	62
2.7.2	Oxidation and reduction titration	63
2.7.3	Colorimetric methods	64
2.7.4	Chromatographic methods	65
2.7.5	Enzymatic methods	65
	References	65
	Suggested reading	66

3 Milk lipids

67

3.1	Introduction	67
3.1	Factors that affect the fat content of bovine milk	68
3.3	Classes of lipids in milk	71
3.4	Fatty acid profile of milk lipids	75
3.5	Synthesis of fatty acids in milk fat	81
3.6	Structure of milk lipids	87
3.7	Milk fat as an emulsion	90
3.8	Milk fat globule membrane	92
3.8.1	Isolation of the fat globule membrane	93
3.8.2	Gross chemical composition of FGM	94
3.8.3	The protein fraction	94
3.8.4	The lipid fraction	95
3.8.5	Other membrane components	97
3.8.6	Membrane structure	97
3.8.7	Secretion of milk lipid globules	100
3.9	Stability of the milk fat emulsion	104
3.9.1	Emulsion stability in general	104
3.9.2	The creaming process in milk	106
3.10	Influence of processing operations on the fat globule membrane	108
3.10.1	Milk supply: hydrolytic rancidity	108
3.10.2	Mechanical separation of milk	111
3.10.3	Homogenization	113
3.10.4	Heating	116
3.11	Physical defects in milk and cream	117
3.11.1	Free fat	118
3.12	Churning	118
3.13	Freezing	126
3.14	Dehydration	126
3.15	Lipid oxidation	127
3.15.1	Pro-oxidants in milk and milk products	130
3.15.2	Antioxidants in milk	132
3.15.3	Spontaneous oxidation	133
3.15.4	Other factors that affect lipid oxidation in milk and dairy products	133
3.15.5	Measurement of lipid oxidation	134
3.16	Rheology of milk fat	134
3.16.1	Fatty acid profile and distribution	134
3.16.2	Process parameters	137
	References	140
	Suggested reading	141
	Appendices	141

4	Milk proteins	146
4.1	Introduction	146
4.2	Heterogeneity of milk proteins	149
4.2.1	Other protein fractions	150
4.3	Preparation of casein and whey proteins	152
4.3.1	Acid (isoelectric) precipitation	152
4.3.2	Centrifugation	153
4.3.3	Centrifugation of calcium-supplemented milk	153
4.3.4	Salting-out methods	153
4.3.5	Ultrafiltration	153
4.3.6	Gel filtration (gel permeation chromatography)	154
4.3.7	Precipitation with ethanol	154
4.3.8	Cryoprecipitation	154
4.3.9	Rennet coagulation	154
4.3.10	Other methods for the preparation of whey proteins	155
4.4	Heterogeneity and fractionation of casein	155
4.4.1	Resolution of caseins by electrophoresis	159
4.4.2	Microheterogeneity of the caseins	160
4.4.3	Nomenclature of the caseins	162
4.5	Some important properties of the caseins	163
4.5.1	Chemical composition	163
4.5.2	Secondary and tertiary structures	175
4.5.3	Molecular size	178
4.5.4	Hydrophobicity	178
4.5.5	Influence of Ca^{2+} on caseins	179
4.5.6	Action of rennets on casein	179
4.5.7	Casein association	180
4.5.8	Casein micelle structure	180
4.6	Whey proteins	186
4.6.1	Preparation	186
4.6.2	Heterogeneity of whey proteins	186
4.7	β -Lactoglobulin	187
4.7.1	Occurrence and microheterogeneity	188
4.7.2	Amino acid composition	188
4.7.3	Primary structure	189
4.7.4	Secondary structure	189
4.7.5	Tertiary structure	189
4.7.6	Quaternary structure	190
4.7.7	Physiological function	191
4.7.8	Denaturation	192
4.8	α -Lactalbumin	192
4.8.1	Amino acid composition	192
4.8.2	Genetic variants	192
4.8.3	Primary structure	192
4.8.4	Secondary and tertiary structure	193
4.8.5	Quaternary structure	193
4.8.6	Other species	193
4.8.7	Biological function	194
4.8.8	Metal binding and heat stability	194
4.9	Blood serum albumin	195
4.10	Immunoglobulins (Ig)	195
4.11	Minor milk proteins	199
4.12	Non-protein nitrogen	199
4.13	Comparison of human and bovine milks	200

4.14	Synthesis and secretion of milk proteins	201
4.14.1	Sources of amino acids	201
4.14.2	Amino acid transport into the mammary cell	203
4.14.3	Synthesis of milk proteins	203
4.14.4	Modifications of the polypeptide chain	205
4.14.5	Structure and expression of milk protein genes	206
4.14.6	Secretion of milk-specific proteins	207
4.14.7	Secretion of immunoglobulins	209
4.15	Functional milk proteins	210
4.15.1	Industrial production of caseins	211
4.15.2	Novel methods for casein production	215
4.15.3	Fractionation of casein	216
4.15.4	Functional (physicochemical) properties of caseins	218
4.15.5	Applications of caseins	219
4.15.6	Whey proteins	219
4.15.7	Casein-whey protein co-precipitates	227
4.16	Biologically active proteins and peptides in milk	228
4.16.1	Lactoperoxidase	229
4.16.2	Lactotransferrin	229
4.16.3	Immunoglobulins	230
4.16.4	Vitamin-binding proteins	230
4.16.5	Growth factors	231
4.16.6	Bifidus factors	231
4.16.7	Milk protein hydrolysates	232
	References	234
	Suggested reading	236
	Appendices	237

5 Salts of milk

239

5.1	Introduction	239
5.2	Method of analysis	239
5.3	Composition of milk salts	240
5.4	Secretion of milk salts	242
5.5	Factors influencing variation in salt composition	243
5.5.1	Breed of cow	243
5.5.2	Stage of lactation	244
5.5.3	Infection of the udder	247
5.5.4	Feed	247
5.6	Interrelations of milk salt constituents	247
5.7	Partition of milk salts between colloidal and soluble phases	249
5.7.1	Methods used to separate the colloidal and soluble phases	249
5.7.2	Soluble salts	250
5.7.3	Measurement of calcium and magnesium ions	254
5.7.4	Colloidal milk salts	256
5.8	Changes in milk salts equilibria induced by various treatments	260
5.8.1	Addition of acid or alkali	260
5.8.2	Addition of various salts	261
5.8.3	Effect of changes in temperature	261
5.8.4	Changes in pH induced by temperature	262
5.8.5	Effect of dilution and concentration	262
5.8.6	Effect of freezing	263
	References	263
	Suggested reading	264

6	Vitamins in milk and dairy products	265
6.1	Introduction	265
6.2	Fat-soluble vitamins	266
6.2.1	Retinol (vitamin A)	266
6.2.2	Calciferols (vitamin D)	269
6.2.3	Tocopherols and related compounds (vitamin E)	272
6.2.4	Phylloquinone and related compounds (vitamin K)	274
6.3	B-group vitamins	275
6.3.1	Thiamin (vitamin B ₁)	275
6.3.2	Riboflavin (vitamin B ₂)	277
6.3.3	Niacin	279
6.3.4	Biotin	281
6.3.5	Panthenic acid	281
6.3.6	Pyridoxine and related compounds (vitamin B ₆)	282
6.3.7	Folate	285
6.3.8	Cobalamin and its derivatives (vitamin B ₁₂)	287
6.4	Ascorbic acid (vitamin C)	289
	References	291
	Suggested reading	291
	Appendices	291
7	Water in milk and dairy products	294
7.1	Introduction	294
7.2	General properties of water	294
7.3	Water activity	301
7.4	Water sorption	305
7.5	Glass transition and the role of water in plasticization	311
7.6	Non-equilibrium ice formation	312
7.7	Role of water in stickiness and caking of powders and crystallization of lactose	313
7.8	Water and the stability of dairy products	313
	References	316
	Suggested reading	316
8	Enzymology of milk and milk products	317
8.1	Introduction	317
8.2	Indigenous enzymes of bovine milk	317
8.2.1	Introduction	317
8.2.2	Proteinases (EC 3.4.-.-)	318
8.2.3	Lipases and esterases (EC 3.1.1.-)	322
8.2.4	Phosphatases	324
8.2.5	Lysozyme (EC 3.2.1.17)	327
8.2.6	<i>N</i> -Acetyl- β -D-glucosaminidase (EC 3.2.1.30)	328
8.2.7	γ -Glutamyl transpeptidase (transferase) (EC 2.3.2.2)	328
8.2.8	Xanthine oxidase (EC 1.2.3.2)	328
8.2.9	Sulphydryl oxidase (EC 1.8.3.-)	330
8.2.10	Superoxide dismutase (EC 1.15.1.1)	330
8.2.11	Catalase (EC 1.11.1.6)	331
8.2.12	Lactoperoxidase (EC 1.11.1.7)	331
8.2.13	Other enzymes	333

8.3	Exogenous enzymes in dairy technology	333
8.3.1	Introduction	333
8.3.2	Proteinases	336
8.3.3	β -Galactosidase	338
8.3.4	Lipases	338
8.3.5	Lysozyme	339
8.3.6	Catalase	339
8.3.7	Glucose oxidase	340
8.3.8	Superoxide dismutase	341
8.3.9	Exogeneous enzymes in food analysis	342
	References	345
	Suggested reading	346

9 Heat-induced changes in milk 347

9.1	Introduction	347
9.2	Lipids	349
9.2.1	Physiochemical changes	349
9.2.2	Chemical changes	351
9.3	Lactose	352
9.3.1	Formation of lactulose	354
9.3.2	Formation of acids	354
9.3.3	Maillard browning	356
9.4	Milk salts	360
9.5	Vitamins	360
9.6	Proteins	360
9.6.1	Enzymes	360
9.6.2	Denaturation of other biologically active proteins	363
9.6.3	Denaturation of whey proteins	363
9.6.4	Effect of heat on caseins	368
9.7	Heat stability of milk	369
9.7.1	Effect of processing operations on heat stability	372
9.8	Effect of heat treatment on rennet coagulation of milk and related properties	373
9.9	Age gelation of sterilized milk	374
9.10	Heat-induced changes in flavour of milk	376
	References	377
	Suggested reading	378

10 Chemistry and biochemistry of cheese and fermented milks 379

10.1	Introduction	379
10.2	Rennet-coagulated cheeses	380
10.2.1	Preparation and treatment of cheesemilk	380
10.2.2	Conversion of milk to cheese curd	382
10.2.3	Acidification	394
10.2.4	Moulding and shaping	397
10.2.5	Salting	398
10.2.6	Manufacturing protocols for some cheese varieties	402
10.2.7	Cheese ripening	403
10.2.8	Cheese flavour	416
10.2.9	Accelerated ripening of cheese	418
10.3	Acid-coagulated cheeses	419
10.4	Processed cheese products	421
10.4.1	Processing protocol	424

10.5	Cheese analogues	427
10.6	Cultured milks	428
	References	432
	Suggested reading	433
	Appendices	434
11	Physical properties of milk	437
11.1	Ionic strength	438
11.2	Density	438
11.3	Redox properties of milk	439
11.4	Colligative properties of milk	443
11.5	Interfacial tension	447
11.6	Acid–base equilibria	449
11.7	Rheological properties	453
	11.7.1 Newtonian behaviour	453
	11.7.2 Non-Newtonian behaviour	454
	11.7.3 Rheology of milk gels	455
	11.7.4 Rheological properties of milk fat	456
11.8	Electrical conductivity	456
11.9	Thermal properties of milk	457
11.10	Interaction of light with milk and dairy products	458
11.11	Colour of milk and milk products	459
	References	460
	Suggested reading	461
	Index	463
