

Index

- A/B milk and yoghurt, 428
Abbé refractometer, 458
Accelerated ripening of cheese, 418
 adjunct starters, 418
 attenuated lactic acid bacteria, 418
 elevated ripening temperature, 418
 exogenous enzymes, 418
 genetically modified starters, 418
Acetyl CoA, , 81, 82, 87, 276
Acetyl CoA carboxylase, 98
Acetylcholine, 276
N-Acetyl-glucosamidase, 247
N-Acetylglucosamine, 327
N-Acetyl- β -D-glucoaminidase, 318, 328
Acid–base equilibria in milk, 449, 451
Acid casein, 211, 212, 213
 see also Casein
Acid-coagulated cheeses, 419
 fermentation of lactose, 419
 fresh acid-curd cheeses, 419, 420
Acid coagulation of milk, *see* Isoelectric
 coagulation of milk
Acid degree value (ADV), 108
Acid milk gels, 455–6
Acidophilus milk, 428
Acid phosphatase, *see* Phosphatases
Activity coefficient, 449
Adenosine triphosphatase, 98, 333
Age gelation of UHT milks, 317, 321, 374
Age thickening of cream, 117
Agglutination
 see also Milk fat globules, 455
Aldolase, 98, 333
Alkaline phosphatase, *see* Phosphatases
Alkan-2-ones (methyl ketones), 408
Alnarp process, 137
Amino acids
 essential, 201
 non-essential, 201
 β -Aminoalanine, 367
Aminopeptidase, 320
Amorphous calcium phosphate, 185
 α -Amylase, 333
 β -Amylase, 333
Analogue cheese, *see* Cheese analogues
Analytical ultracentrifugation, 155
Antioxidant effect of sulphhydryl groups, 377
Antioxidants, 265
Annatto, 460
Apo-lactoferrin, 364
Apparent viscosity, 454, 455
Arachidonic acid, 142
Arteriovenous difference studies, 201
Arthrobacter spp., 407
Attrition dryers, 211
Ascorbic acid (vitamin C), 132, 265, 289–90,
 315
 concentration in milk and dairy products,
 290, 292, 293
 deficiency syndromes, 290
 dehydroascorbate, 289
 2,3-diketogluonic acid, 289
 function, 290
 oxidation of, 440–2
 reducing agent, 290
 role as antioxidant, 290
 RDA values, 290
 RNI values, 290
 stability, 290
Ash, 239, 240
Aspartyl (acid) proteinase, 384
 tertiary structure, 385
 see also Chymosin; Cathepsin D
Aspergillus niger, 340
Auto-oxidation, 134
Avidin, 281

Babcock butyrometer, 118
Bactofugation, 113, 382, 406
Bakery products, 220
Beriberi, 276
Bicarbonate, 239
Bifidobacterium spp., 43, 45, 49, 231
Biologically active proteins, peptides, 146,
 228
 angiotensin converting enzyme (ACE)
 inhibitor, 234
 bifidus factors, 231
 calmodulin-binding peptide, 234
 glucose oxidase, 229
 growth factors, 231
 bombasin, 231
 fibroblast growth factors, 231
 IFG2, 231
 IGF1, 231

- Biologically active proteins, (*cont.*)
 mammary-derived growth factors,
 231
 platelet-derived factor, 231
 transforming growth factors, 231
 lactoperoxidase, 229
 nutraceutical, 231
 vitamin-binding proteins, 230
 xanthine oxidase, 229
see also Immunoglobulins; Vitamin-binding proteins; Metal binding proteins; Protein hormones; Caseinomorphins; Immunomodulating peptides; Platelet modifying peptides
- Biotin, 265, 275, 281
 binding proteins, 281
 concentration in milk and dairy products,
 281
 deficiency, 281
 food sources, 281
 intake, 281
 RDA value, 281
 role in gluconeogenesis, 281
- 'Bitty cream' defect, 117, 118, 317
- Bixin, 131, 460
- Blood serum albumin (BSA), 187, 195
 binding of fatty acids, 195
 binding of metals, 195
 stimulation of lipase activity, 195
- Blue cheese, 76
- Boiling point of milk, 437, 443
- Brassica, 332
- Braunauer-Emmett-Teller model, 307, 308
- Brevibacterium linens*, 407, 432
- Brie, 406
- Brushite, 259
- Buffering capacity, 450, 451
 bicarbonate, 450
 citrate, 450
 soluble calcium phosphate, 450
- Buffering curves, 452
- Buffering index, 450
- Bulk density of milk powders, 458
- Butanoic acid, 87, 142
- Butter, 78
 blending, 138
 blending with vegetable oils, 138
 polyunsaturated fatty acids, 139
 buttermaking, 118, 119, 125
 butter churns, 123
 churning, 118
 phase inversion, 121
 frozen cream, use of, 126
 hardness of, 90, 134
 lactic butter, 120
 diacetyl in, 120
 seasonal variations in firmness, 78
 structure of butter, 120, 121, 456
 sweet-cream butter, 120
 water droplets in butter, 121
- Buttermilk, 71
 Buttermilk, cultured, 429
 Butter oil, 120, 126
 Butylated hydroxytoluene, 132
 Butyrophilin, 94, 95, 102
- Caking of whey and milk powders, 33
- Calciferols (vitamin D), 269
 cholecalciferol (vitamin D₃), 269, 270
 deficiency of, 271, 272
 osteomalacia, 271
 rickets, 271
 7-dehydrocholesterol, 269, 270
 1,25-dihydroxycholecalciferol, 271
 effect on plasma calcium, 271
 ergocalciferol, 271
 25-hydroxycholecalciferol, 270
 hypervitaminosis D, 272
 metabolites of vitamin D₃, 271
 pre-vitamin D₃, 269
 principal sources, 272
 RDA values, 271
 RNI values, 271
 stability, 272
- Calcium, 239, 241, 253, 261-2
 measurement of, 254
- Calcium-ion electrode, 256
- Calcium phosphate, 38, 453
- Camembert, 215, 406
- Carbon tetrachloride, 118
- Carbonate, 239, 241, 251
- Cardiolipin, 143
- Carotenoids, 73, 74, 97, 131, 132, 266, 268,
 269, 459, 460
 β -carotene, 73, 74, 131, 266, 267, 268
- Casein, definition, 149
 amino acid composition, 163, 164
 applications of caseins, 219
 association, 180
 chemical composition, 163
 degree of phosphorylation, 160
 disulphide bonding, 160
 electrophoresis of, 159
 functional (physicochemical) properties
 of caseins, 218
 gelation of, 218
 genetic polymorphism (variants), 162
 heterogeneity and fractionation, 155, 163
 heterogeneity of bovine casein, 163
 homology, 171
 hydration of, 218
 hydrolysis of primary caseins by plasmin,
 160
 hydrophobicity, 178
 industrial fractionation of casein, 216

- industrial production of caseins, 211
